

# SHAPING THE FUTURE OF AEROSPACE & DEFENSE TECHNOLOGY

FROM SAUDI INGENUITY TO GLOBAL IMPACT

Interstellar Solutions, a part of RAZ Holding Group, is a leading technology solution provider based in Riyadh, Saudi Arabia. Specializing in the Aerospace and Defense industry, we are the proprietors of the G21 Intellectual Property (IP), a revolutionary Enterprise Resource Planning (ERP) system. We have empowered our customers to streamline business processes and ensure greater operational readiness.

**G21 ERP SYSTEM HAS BEEN OPERATIONAL SINCE 2013.**

**TRUSTED BY MULTIPLE DEFENSE FORCES IN KINGDOM, EMPOWERING 5,000+ ACTIVE USERS.**

**CHAMPIONING LOCAL CONTENT, FUELING SAUDI SKILL DEVELOPMENT, AND LOCALIZING GOVERNMENT SPENDING.**

**Centralized National Item Catalog:** Capability of creating a DLA and NATO compliant robust, standardized national catalog for KSA Government and Defense entities.

**MRO & ILS Consultation:** Providing expertise and insights for complex and integrated Supply Chain, Maintenance, and Logistics processes.

**Commitment to Saudi Arabia:** Over 50% Saudi talent in -house; focused on developing aerospace and defense ecosystem in line with Vision 2030's goals.

**Revolutionary G21 ERP System:** Custom-designed for KSA's Government and Defense needs; automated, efficient, and compatible with existing infrastructure.

**23+ Years of Proven Success:** Expertise in managing challenging Saudi environments; ensuring impactful ERP implementations.

**Investment in Local Talent:** Trained 5,000+ individuals for 20,000+ hours in military courses; aligned with Vision 2030 for knowledge transfer and workforce development.

# SYSTEM MODULES

## Enterprise Functionality and Key Features

### Supply Chain & Logistics Management

- Centralized DLA & NCS compliant catalog for national-level item management
- Complete real-time warehouse management with integrated barcoding and stock counting
- Integrated Procurement, Transportation, and Shipment management

### Training & Learning Management

- Digital Training Program for Operators and Crewmembers for management of evaluations and proficiency
- Technical On-the-Job (OJT) management for technicians and technical professionals
- Centralized courseware database

### Maintenance Management

- Scheduled Maintenance and Lifecycle Management for aerospace and ground equipment systems
- Streamlined MRO operations with integrated work order management
- Enterprise readiness reporting for equipment systems and efficient Repair & Return (RNR) management

### Asset Management & Organizational Supply

- Total Asset Visibility, Tracking, and Reporting of Fixed and Durable Assets
- Real-time tracking of Calibrated Assets and Major End Items
- Securely maintain the Modified Table of Equipment and Organization (MTOE) – Property Allowance Table

### Operations Management

- Mission planning and scheduling solution for Ground and Aviation missions of all types
- Real-time operational readiness reporting of critical equipment and personnel
- Centralized management and tracking of mission progress and key metrics for enhanced situational awareness

### Personnel Admin Management

- Enterprise security across user access, activity, and transactions with centralized tracking and control
- Build and map organizational hierarchy that mirrors the Command and Supply Chain structures of the organization
- Automated batch processing for efficient data migration

### Human Capital & Finance Management

- Real-time analytics on benefits enrollments, and healthcare plan choices, including employee metrics
- Compare labor costs against organizational needs and establish daily budget caps to control labor expenses
- Comprehensive, full-featured, financial and project cost accounting module with DCAA compliance

### Ammunition & Fuel Management

- Tracking acquisitions and orders for arms and ammunition
- Ease of managing inventory, shipping, customer information, and more within a single system
- Tracking usage of fuel consumption for different types of equipment

### Centralized Technical Library

- Comprehensive repository of technical resources and documentation, enhancing knowledge accessibility and supporting informed decision-making
- Ensure the highest level of data security for sensitive documents with classification-based protection
- Guarantee access to the latest document versions with active revision history tracking
