

iSTELLAR

COMPANY PROFILE

ABOUT OUR COMPANY

Interstellar Solutions stands at the forefront of Saudi Arabia's technology landscape, delivering a groundbreaking enterprise system and consultancy to the aerospace, defense, and government sectors.

As a strategic pillar within the QUDRA Holding Group, our company is renowned for empowering transformation through the design and deployment of advanced, secure, and scalable digital platforms. With a proven track record in operational excellence, Interstellar Solutions is trusted by leading organizations to deliver results that exceed expectations and drive lasting impact.

iSTELLAR

OUR MISSION

To set the benchmark for technological excellence in the Kingdom and beyond by developing and implementing world-class solutions that accelerate national transformation, advance the aerospace and defense sectors, and deliver measurable value to our partners.

OUR VISION

To be recognized globally as the most trusted and innovative partner for enterprise solutions in highly critical and security-conscious industries. We aspire to shape the future through digital leadership—enabling clients to reach new heights of efficiency, resilience, and competitiveness in a rapidly evolving world.

ISTELLAR

OUR VALUES

Innovation at the Core: We harness technology, creativity, and continuous learning to anticipate change and deliver pioneering solutions.

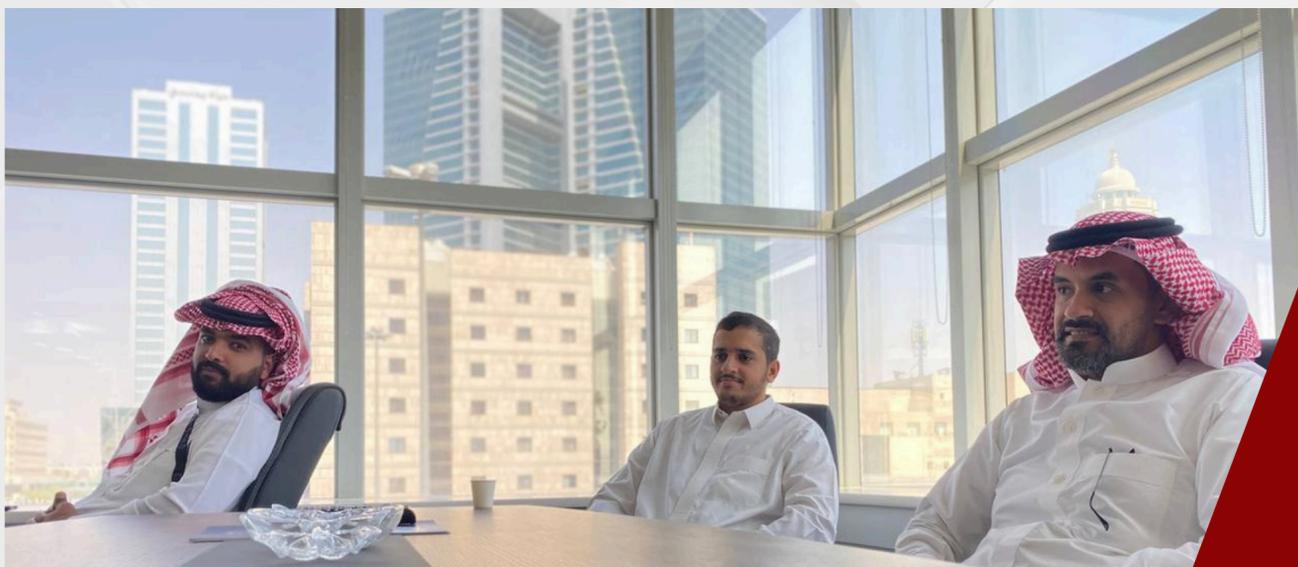

Integrity & accountability: We keep our commitments with transparency and professionalism, earning enduring stakeholder trust.

Strategic Collaboration: We build powerful partnerships with clients, technology leaders, and Saudi talent to realize bold, shared visions.

Relentless quality: Excellence is non-negotiable—driving our execution, customer experience, and every aspect of our service.

Nation Builders: We actively advance Vision 2030 through local capacity-building, knowledge transfer, and technology localization.

With distinctive technical depth, industry expertise, and a fierce commitment to national progress, Interstellar Solutions sets new standards for what's possible in Saudi Arabia and worldwide.

OUR LEADERSHIP

Our leaders set the standard through ethical decisions, strategic vision, and a relentless commitment to developing future leaders.

Mr. Riyadh Al-Zamil
Founder

Mr. Riyadh Al-Zamil is the Founder and Chairman of Raz Holding Group, a premier investment and entrepreneurship-focused organization based in Saudi Arabia. Under his leadership, Raz Group has developed a diversified platform that scales innovative ventures and strengthens the entrepreneurial ecosystem across the Kingdom and the broader GCC region.

A seasoned serial entrepreneur and active investor, Riyadh has participated in dozens of high-growth ventures and holds board positions in numerous social institutions and joint-stock companies. He is the architect of the “solidarity investment” model—a distinctive, value-driven approach to collaborative investing that is now part of the curriculum at several Saudi universities.

Beyond his commercial interests, Riyadh is a distinguished advocate for SME development and youth empowerment. He has served as Chairman of the Entrepreneurship Committee at the Riyadh Chamber of Commerce and is widely recognized as a lead investor on the Saudi version of Shark Tank.

His influence extends to various public and advisory roles, where he contributes to national investment councils and entrepreneurial associations, directly supporting the Kingdom’s economic transformation and innovation goals.

With a strong commitment to mentoring the next generation, Riyadh continues to leverage his expertise to foster a sustainable and vibrant business environment within the Saudi private sector.

Eng. Mazen AlZamil

Founder

Eng. Mazen AlZamil is a seasoned business leader with over 20 years of experience driving growth, digital transformation, and innovation across government, enterprise, and industrial sectors.

He has held senior roles at Elm, SAP, Cisco, and SITE, where he led the development and scaling of mission-critical digital platforms in complex and regulated environments.

His expertise spans platform strategy, ecosystem building, and go-to-market execution—bridging business needs with scalable technology solutions aligned with national priorities such as Saudi Vision 2030.

Eng. Curtis Massenburg Sr.
Founder
Chief Operations &
Technology Officer (COTO)

Curtis Massenburg Sr. is a seasoned leader at the intersection of technology, innovation, and defense, with over 34 years of experience across Supply Chain Management, IT, Aviation/Aerospace, and Defense, including 26 years consulting in Saudi Arabia with defense, government, and commercial sectors.

A decorated U.S. Army veteran, Curtis built an exceptional military career marked by distinction at every level:

- **Recognized** as the top Non-Commissioned Officer worldwide for Information Systems Command (ISC)
- **Inducted** into the Sergeant Morales Club at the age of 22 (one of the youngest in club history with only 3 years of service). The Sergeant Morales Club is a prestigious recognition program in the US Army that honors exceptional NCOs who exemplify the highest standards of integrity, military professionalism, and leadership.
- **Appointed** Project Manager of a global IT modernization initiative for Civilian Personnel Offices at just 23 years old
- **Maintained** a 100% Quality Assurance inspection and pass rate across all US Army projects
- **Served** as Senior Curriculum Developer and Instructor at the U.S. Army Computer Science School
- **Graduated** as Distinguished or Honor Graduate (top 2%) of every US military course attended
- **Promoted** 12 years ahead of his peers

This foundation gave Curtis deep end-to-end expertise in defense operations, spanning IT, supply chain, logistics, maintenance, asset management, training, and personnel—experience he has leveraged in roles from Program Manager to Senior Director to shape advanced defense business process engineering.

He conceived, designed, and led the development of the **G21** system—one of the world's first Defense ERP platforms—investing thousands of hours to embed U.S. DoD and NATO doctrine, creating a first-of-its-kind solution that is transforming defense and government operations in Saudi Arabia and beyond.

Under his leadership, Interstellar Solutions has maintained a 100% success rate on enterprise software implementations across Saudi Arabia's defense and government sectors for over 13 years, while he has personally trained hundreds of Saudi professionals in Supply Chain Management, IT, and ERP systems.

As Chief Operating & Technology Officer (COTO), Curtis drives Interstellar Solutions' technical strategy, steering complex ERP implementations and change programs for governments, armed forces, and high-reliability industries.

Deeply committed to knowledge transfer and Vision 2030, and fluent in English and Arabic, he bridges global expertise with local insight to ensure partners succeed at every stage of their transformation journey.
